

Garden bench you can make from 1/8" wood to accompany Garden Town Buildings  
Use Balsa or Hardwood, as found in hobby and craft stores

•Easy to read patterns and instructions

**Supplies**

- Balsa Wood or Hardwood - 21" of 1/4" strips. You can buy strips or make them.
- Wood Glue
- Paint or Stain-We suggest the water based acrylic paints found in a multitude of colors in arts and crafts stores.
- Sealer - Water Base Varnish found with the acrylic paints or a sealer, such as polyurethane.

**Tools**

- For Hardwood - Saw for cutting out small parts, such as a jigsaw or coping saw
- For Balsa Wood - X-ACTO knife and metal ruler
- Ruler and Pencil - A plastic see-thru ruler with a 1/8" grid is helpful.
- T-square
- Small clamps to hold pieces while drying. The X-ACTO clamps for small pieces are good if you have some.

Optional: Balsa stripper. A handy gadget to make uniform strips of wood from balsa if you want to make your own strips and are making a lot them. Otherwise, you can measure off strips and cut with X-ACTO knife, using a metal ruler for guide.

**The Patterns - All Wood is 1/8" Thick**  
Cut from Balsa Wood or Hardwood

Note: Patterns are actual size

21" of 1/4" Strip  
Can be cut from  
2-1/2" x 2-3/4"

**Assembly**

**1. Cut out all Parts**

**2.**

Refer to the side view  
On a flat surface glue the top two Slats (A)  
to the Back Brace (B) and allow to dry.

**3.**

Glue the two Seat Braces (C)  
to one Slat (A), as shown.  
Clamp to ensure that  
90° angle will be kept

**4.**

Glue three more Slats (A)  
to the top of the seat brace.  
Center slat will be 1/16" from  
the outer slats.

**5.**

Turn the dry seat upside down.  
Glue the two legs to the seat bottom  
and brace sides. Legs will be set back  
1/8" from the seat front.

**6.**

Turn the finished seat right side up.  
Level the seat section with the back section  
and glue to the back.
